

**PROFILE**

I'm a web developer and user interface designer with a passion for delivering beautiful, enjoyable and accessible web experiences. I am particularly interested in improving web development processes, and enjoy helping to make complex technological systems more comprehensible to clients and teammates.

**SKILLS**

- ▶ 6+ years experience in all major stages of web development, including: client goal assessment, project management, conceptual preparation via mockups/prototypes/design, front-end coding, CMS integration and post-launch evaluation.
- ▶ Fluent in HTML and CSS, with 7+ years experience. High commitment to producing code that is clean, standards-based, pixel-perfect and consistent cross-browser.
- ▶ Proficient in Javascript/DOM scripting, jQuery and AJAX, 4+ years experience.
- ▶ Very experienced in PHP-based CMS, including [ExpressionEngine](#), [Wordpress](#) and [Ekklesia360](#).
- ▶ Competent in procedural PHP, growing knowledge of Object Oriented PHP and database scripting. Basic knowledge of Flash. Exposure to MVC frameworks including CodeIgniter and Django.
- ▶ Skilled in Photoshop, Fireworks, Illustrator and Omnigraffle. Strong grasp of visual and UX design principles. Comfortable in Mac or Windows.

**EDUCATION**

**University of Virginia** Charlottesville, VA

**B.S. - Aerospace Engineering, May 1995**

**EXPERIENCE****Senior Web Developer**

**Church Plant Media**, [www.churchplantmedia.com](http://www.churchplantmedia.com)

June 2009 - Present

- ▶ Convert designs from Photoshop to valid HTML/CSS/Javascript templates ready for CMS integration.
- ▶ Interact directly with clients in technical support and training capacities.
- ▶ Make key strategic contributions to company roadmap as we adjust to provide more automated, affordable and reliable solutions to meet our clients' needs.

**Freelance Web Developer**

[www.getluke.com](http://www.getluke.com)

August 2006 - Present

- ▶ Full-service web solutions for small to medium organizations.
- ▶ Responsible for all phases of client projects, from project conception through build stages, launch and evaluation.

## **Senior Web Developer**

**Monk Development**, [www.monkdevelopment.com](http://www.monkdevelopment.com)

June 2007 - May 2009

- ▶ Implemented designs into HTML/CSS/Javascript to yield standards-compliant sites. Addressed key usability issues before going to development phase.
- ▶ Full CMS integration using our flagship product, Ekklesia360. PHP scripting to enhance functionality.
- ▶ Developed a Project Estimate tool that would allow us to quickly and accurately assess the time and resources required to complete a wide range of web sites. Coined it the “ProjEstimator”.

## **Junior Front-End Web Developer**

**Global Media and Communications Team, Campus Crusade for Christ**

August 2006 - June 2007

- ▶ Converted Photoshop designs into clean, semantic HTML and CSS templates for the re-launch of [ccci.org](http://ccci.org), our global, enterprise-level site.

## **Communications Director**

**Mid-Atlantic Regional Team, Campus Crusade for Christ**

September 2005 - August 2006

- ▶ Art direction and web development for all regional media including web sites, videos and print materials.

## **Conference Director**

**Mid-Atlantic Regional Team, Campus Crusade for Christ**

August 2001 - September 2005

- ▶ Led a core team and over 40 staff volunteers in preparation for the Christmas Conference, our most significant regional event of the year. Implemented changes that helped the conference grow from 450 to over 900 attendees.
- ▶ Co-directed three other major regional events, created web sites for conferences, provided technical support to over 150 regional staff members

## **REFERENCES**

“Luke is a joy to work with. On multiple occasions I have turned to him for help with web projects. He is incredibly thorough and patient and takes the time to wade through my messy code and figure out what I was trying to make it do. Because he understands web standards and CSS so thoroughly and loves to do things correctly he is able to rewrite everything and give me back clean, elegant, standards-based code that works on all platforms and displays exactly what I need it to.”

— **Tim Henderson**, founder of [centerfieldproductions.com](http://centerfieldproductions.com)

“Luke has an eye for usability, design, and aesthetic appeal. He gave special attention to listen to what I needed and hoped for, then made it a reality. He is thorough and produces a clean product that is tried and tested in all relevant applications. Being a perfectionist he granted my site some bonus functions that I had not even thought of, but delight in using. He can effectively translate the confusing language of web design in to layman’s terms, empowering me to understand what is happening behind the scenes.”

— **John Kidd**, director of Lifelines at the University of Virginia, [lifelinesuva.com](http://lifelinesuva.com)
